Education

Vellore Institute of Technology, Bhopal	CGPA: 8.25
<i>Bachelor of Technology in Computer Science Engineering</i>	2023 – 2027
CBSE – Class XII	85%
<i>Maharaja Agresen Public School</i>	2022
CBSE – Class X	84.2%
<i>Maharaja Agresen Public School</i>	2020

Projects

YatraMind AI <i>Python, FastAPI, Streamlit, LangGraph, LangChain, Groq API</i>	Dec 2025 – Mar 2026
- Architected a production-ready multi-agent AI travel planner using LangGraph, FastAPI, and Groq LLM, enabling intelligent itinerary generation through six specialized autonomous agents. - Orchestrated 5+ live APIs for flights, hotels, maps, weather, currency conversion, visa guidance, safety intelligence, and expense management for end-to-end travel planning. - Implemented AI-powered recommendation and optimization algorithms for personalized itineraries, budget allocation, and route planning, reducing manual planning effort by 70%. - Designed a modular backend with REST APIs and dynamic integrations, delivering real-time travel insights, interactive maps, PDF itinerary generation, and AI chatbot assistance.	
AI Personal Companion <i>Python, Speech Recognition, Coqui TTS</i>	Feb 2025 – Apr 2025
- Developed a voice-enabled AI assistant using Python, Google Speech Recognition API, and Coqui TTS for real-time speech recognition and natural voice synthesis. - Implemented voice-command processing to trigger assistant actions and generate context-aware responses through the conversational pipeline. - Integrated a VTuber anime character to provide real-time visual responses and create an interactive conversational experience. - Optimized audio processing and inference workflows to improve response speed, speech clarity, and conversational quality.	
Heart Disease Predictor <i>Python, TensorFlow, VGG16, CNN, Streamlit</i>	Sep 2024 – Dec 2024
- Developed a VGG16-based deep learning model for cardiovascular disease image classification using transfer learning. - Built a data preprocessing pipeline involving normalization and augmentation to improve model robustness and data quality. - Leveraged TensorFlow, CNNs, and feature extraction techniques to train and evaluate the classification model, achieving 87% classification accuracy. - Built an interactive web interface using HTML, CSS, and JavaScript for uploading medical images and displaying model predictions.	

Certifications

Intermediate Machine Learning	Kaggle — Certificate
Introduction to Deep Learning	Kaggle — Certificate
Machine Learning	NPTEL — IIT Madras
Oracle Cloud Infrastructure 2025 AI Foundations Associate	Oracle — Certificate
Oracle Certified Foundations Associate – Agentic AI	Oracle — Certificate

Technical Skills

Programming Languages: Python, C++

Data & Databases: SQL, DBMS, Pandas, NumPy, Data Preprocessing, Exploratory Data Analysis (EDA), Data Visualization

AI & Machine Learning: Scikit-learn, TensorFlow/Keras, Feature Engineering, Model Evaluation, CNN

Frameworks & Tools: FastAPI, Streamlit, Git, GitHub, Jupyter Notebook, Google Colab

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), Machine Learning, Database Management Systems (DBMS), SQL
